

Phlebotomy Technician

Classes Begin: August 21, 2018

****Free Orientation: Thursday July 19, 6:00pm @ VVC**

VVC's Certified Phlebotomy Technician program prepares a student with the education, training, experience, and examination requirements as specified by the California Department of Health Services.

Phlebotomists collect blood samples and units for laboratory tests, transfusions, donations, or research.

Phlebotomists who work in medical clinics and hospitals are called Certified Phlebotomy Technicians (CPTs) and generally collect blood samples based on a physician's order. The blood specimen, once taken, is then sent for diagnostic testing in a laboratory.
